

# CO Portable

Portable carbon monoxide analyzer

## Carbon monoxide.

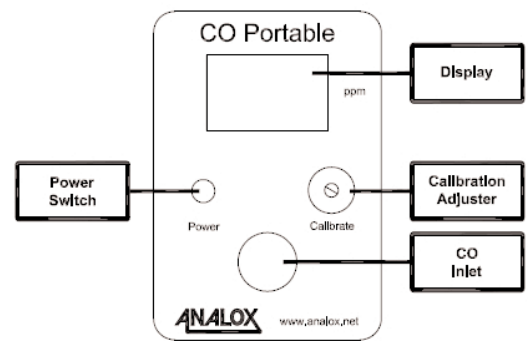

Carbon monoxide is a highly toxic gas which cannot be detected by sight or smell. When carbon monoxide is inhaled it bonds with hemoglobin and forms carboxyhemoglobin. This affects the ability of blood to carry oxygen around the body.

It only takes a small concentration of carbon monoxide, breathed at depth, to affect the human body. Symptoms of CO poisoning can include headaches, fatigue, confusion and dizziness. However, prolonged exposure could lead to unconsciousness, brain damage and even death.

## The solution.

The CO Portable is a compact analyzer which measures CO levels from 1 to 100ppm.

Small enough to fit into your dive bag, you can take the CO Portable anywhere, ensuring all of your dives are CO safe.

## Specifications

Range CO:	0 to 100ppm CO	Sensor life:	Expect 18 months in room air
Accuracy:	± 1ppm	Sensor response:	12 months
Display:	3 digit	Response time:	90% in < 15 seconds
Power:	3 AAA batteries	Stabilisation time:	15 minutes when first installed
Operating temperature:	32 to 122°F	Dimensions:	Length - 3.86 inches Width - 2.5 inches Depth - 1.5 inches
Operating humidity:	10 to 95% RH
